Bellevue, WA 98006

## **Objective**

With many years of experience working in the IT field as a web developer and Linux/Windows system administrator, I am interested in working for a fast-paced company who can utilize all of my skills. Being a highly motivated person I look forward to new challenges and the ability to apply my knowledge and resourcefulness to any task given to me.

## **Summary**

- Over five years of programming and web development experience.
- Skilled in website design, implementation, architecture, GUI design and development.
- Several years of Linux administration in hosting and corporate environments.

## **Computing Skills**

### Operating Systems:

- Microsoft Windows (XP, 2000, 98/95, Vista, 2003)
- Linux (Redhat, CentOS, Gentoo, Debian, Ubuntu, Slackware, Suse)
- BSD (FreeBSD, OpenBSD, NetBSD)
- Sun Solaris 8/9
- Mac OSX

### Web Technologies, Languages & Software:

- PHP 4 and 5
- HTML, XHTML, XML, CSS
- Javascript, AJAX, DHTML
- Shell Scripting ( Bash, Sh, Tcsh, Csh, Kshell )
- SQL Databases ( MySQL, PgSQL, MSSQL )
- Nagios (Opsview, NRPE)
- NTP
- Backup (rsync, bacula, etc.)
- Familiarity with other web technologies (.NET, Perl, ORACLE etc.)

### Hardware:

- All x86 platforms (Intel P3/P4/Xeon, AMD Athlon/64/Opteron), Apple PPC, Sparc
- Network equipment (HP Procurve Switches, Cisco Routers, Switches, and Firewalls)
- Load Balancers (F5 LTM's and GTM's, Netscaler MPX)
- Most other conventional hubs, switches and routers (Linksys, Netgear, D-Link)

### Networking:

- Thorough understanding of networking protocols and features (IPV4, IPV6, BGP, RIP, VRRP)
- Active Directory, Samba, NFS, Kerberos, LDAP
- Implementing 10/100/1000 office and service provider networks.

## Employment

### **Airbiquity Incorporated - Seattle, WA**

Senior Systems Engineer: January 2008 - Present

- Responsible for deploying, configuring, and monitoring highly available linux and windows systems, using IBM and HP servers.
- Writing custom scripts for deployment of services and standard configurations. Implementation of puppet for deployment automation.
- Designing and implementing highly available networks with cisco switches, routers and firewalls.
- Configuring and maintaining F5 and Citrix Load Balancers for SIP, RTP, HTTP, DNS and other common protocols.
- Implementing unified login/authentication against windows active directory and RSA securid with ldap and radius for servers, switches, and web interfaces.

### **Netriver Inc. - Lynnwood, WA**

System Administrator and Development Consultant: November 2006 – December 2007

- Configuring and deploying logging and monitoring systems, server and network wide, using those systems to actively and reliably diagnose and solve issues.
- Developing new technologies and services for the company's clients, increasing company revenue with the addition of these new services, as well as increasing efficiency with the automation of new and existing services
- Developing and maintaining several websites and applications, mainly using PHP, JavaScript and on occasion ASP (C#, VBscript)
- Working with clients to produce unique and efficient solutions for their company's needs

### **Kanbay Incorporated - Phoenix, AZ**

Consultant/PHP Developer: March 2006 - October 2006

- Developing and extending our helpdesk application using the Dotproject open source project as a base
- Configuring, testing, and deploying a load-balanced solution in a failover and active/active configuration using RedHat Cluster Suite, HP Service guard, and Cisco load-balancing
- Deploying and configuring Nagios server monitoring tool for Linux, Windows, AIX, and other server environments for multiple clients
- Assisting fellow consultants within the company deploy Nagios among their clients

### **Hostdime - Orlando, FL**

3rd level Systems Administrator and Lead Developer: April 2005 - Dec 2005

- Troubleshooting complex issues in Linux and BSD environments.
- Configuring and implementing server environments, including Linux, BSD, Solaris and Windows.
- Lead developer on in-house applications, including billing systems, client management systems, server inventory, IP allocation tools, and nearly every system now in use at the company.

### **aBum.com - Toronto, Canada**

In house developer: May 2004 - March 2005

- Designing, developing, and implementing code to manage and display content.
- Search engine optimization, and UI design.

- Marketing and advertising for company growth, including ad placement and profit analysis statistics.

### **Contract and Personal Projects**

PHP, HTML/CSS, Javascript Projects: 2000 - Present

- WTFServe.com – Dedicated Servers and Virtualized Server Environments
- DuggHunt - Search engine designed around the API and tools of Google, Yahoo, and the popular technology site digg.com
- Ebaumsworld.com - enews, elinks, and forum modifications.
- Exocontrol v2 & v3 - Game Server Control panel
- Doorstop - Faster, more efficient Nagios/Server monitoring replacement (non commercial)
- Decc/DcAdmin - Server/client login and Management System; features including remote restart servers, configure rdns, request new servers, update client information and support ticket integration.
- goonmap.com - Community Mapping software using Google Map API.
- Several small contract jobs and personal projects consisting of PHP coding and HTML/CSS/Javascript
